## Next Generation 4K HDMI Video Splitting Solutions

Running out of 4K ports on your TV or computer monitor? Need to broadcast movies, games or presentations on multiple monitors at the same time?

The newly developed **HDMI-SP-2** is a fully featured, 4K video capable automatic HDMI signal switch that its simple to install and totally compatible with TVs, monitors, presentation displays and professional imaging systems.

Pocket-sized, means it can fit anywhere and enables both HD video, images and audio to be duplicated to two, independent screens without any signal degradation.

Perfect for gamers needing multiple video and audio broadcasting, education for the classroom and business applications such as showroom POS and other presentation systems.
