Plug n' Play HD HDMI Video Splitting Solutions

Need a cost-effective but high quality solution for your HD video and audio splitting or duplexing tasks?

The newly developed **HDMI-SP-4** is a popular choice for standard HDMI signalling, allowing up to 4 independent TVs, monitors or other A/V systems to be connected concurrently, to one source.

With no loss in signal quality across all supported video and audio resolutions makes the HDMI-SP-4 ideal for home theatre's, computer displays as well as professional applications including education and business presentations.

Compact in size with on-board status LEDs, complete with newly developed HDMI auto-switching technology with absolutely no software to install, just connect your existing HDMI cables and enjoy a multi-screen and audio experience.

advanced features:

Compact, 4-Port output HDMI video splitter

Supports full HD 1080p and 3D video with audio

Backward compatible resolution support

Deep Colour support for excellent visual clarity

Bundled power cable supplied as standard

Supports HDMI cables up to 15m (5m in, 10m out)

Supports DTS-HD(tm), Dolby-TrueHD(tm) for superb sound

Ideal for gaming, home theatres, education and presentations

Plug n' Play - automatic signal switch sensing technology
