

High density fully featured USB and Video control

ADDERView CATxIP 5000

High density fully featured USB and Video control for local, remote and global users

PRODUCT IN BRIEF

The ADDERView AVX5016 IP is the culmination of Adder's KVM over IP expertise to date. This new device offers 4 non blocking simultaneous IP connections together with a local port (5 separate users), and allows the user to control 16 separate devices. The AVX5016 IP is very small and compact enabling you to fit two units side by side to support 32 computers and 10 sessions in just 1U of rack space.

Using Adder's CAM modules, you can connect the switch via CAT5e cable to any type of server including PC, Mac and Sun. Country code reporting, DDC and continuous keyboard and mouse emulation further ensure faultless operation across your unique installation.

FEATURES

4 simultaneous IP users

Allows 4 simultaneous global users to connect via IP to any of the 16 connected devices.

Faultless video quality

Direct connection for 1 local user to connect straight into the switch.

LDAP integration

Authenticate users against your existing LDAP infrastructure. This feature can be enabled and disabled.

RS232 control

Integrated RS232 gives you the ability to control other external devices such as power management devices.

Ecopulse circuitry

Ecopulse powers down unnecessary circuits when not required to reduce power requirements. Over the life of the product this will save significant power resources.

Encryption and Authentication

This enterprise grade KVM over IP switch employs AES128 bit encryption and RSA2048 authentication ensuring your control system remains secure at all times.

Configuration

The AVX5016 IP allows you to configure 16 separate users internally with unique access privileges all of which are stored within the switch.

Open Architecture

Adder's continuous improvement policy further ensures your system against future hardware changes - Adder offers free firmware updates for the life of the product. Furthermore, Adder's open architecture design philosophy will not tie you in to specific manufacturer's equipment.

ADDER.net

Network management software, automating the task of managing your network control hardware.

Intelligent video thresholding

Adder's innovative active de-artifacting technology automatically calculates the ideal threshold for any computer or KVM switch so that video displays are refreshed with optimum immediacy - while "screen junk" is kept to an absolute minimum.

Flexible screen scaling

Adder solutions provide point-and-click screen scaling, so that users can quickly accommodate target devices running any size display with any aspect ratio. Adder solutions also allow users to easily override scaling if and when they require unscaled pixel-to-pixel mapping.
