Monitor Mounts
## for all occasions

Ergonomic Workspace

The main reason for office workers to call in sick nowadays are spine deseases. A average of 34% of all sickleave certificates are due to this.

Investment of employers

Unfortunately employers still only invest 1% of all administrative expenditures into the workspace facilities, which still causes many employees to sit in a uncomfortable and unhealthy position in front of their screen causing massive sickleave drop outs, producing higher monetary losses than a investment into ergonomic office appliances.

With our products we can supply you with a wide range of ergonomic solutions matching all your employes needs thanks to a variable adjustment for pure sitting enviroments as well as sit/stand work-places or even wall mountable solutions

Minimum requirement of the employer's liability insurance association
